Perspectives on Homelessness in the Denver Metro Area:
Key Findings from Opinion Research to Guide Public Will-Building

Survey Conducted January 14-22, 2015

Dave Metz & Lori Weigel
Methodology

- Telephone interviews with 812 residents (registered voters) across the seven-county Denver Metro area
- Interviews conducted January 14-22, 2015
- Interviews in English and Spanish and on landlines and wireless phones
- Bipartisan research team of Fairbank, Maslin, Maullin, Metz & Associates (D) and Public Opinion Strategies (R)
- Base sample of 612 voters region-wide, with oversamples of 100 additional African-Americans and 100 additional Latinos
- All data statistically weighted to reflect the true ethnic composition of the regional electorate
- Total samples and margins of sampling error include:
  - \( N=612 \) voters regionwide: +/- 4.0%
  - \( N=122 \) African Americans: +/- 8.9%
  - \( N=158 \) Latinos: +/- 7.8%
The Denver Metro Region

Boulder
Broomfield
Denver
Adams
Jefferson
Arapahoe
Douglas
Key Findings

- Fewer than one-third of residents (31%) view homelessness as a significant concern in their own city or town, but nearly twice as many (58%) see it as a problem in the Metro region.
- Residents’ predominant image of the homeless is single males – particularly veterans.
- Residents view unemployment, drug abuse, and mental illness as the major drivers of homelessness; they attribute less impact to family dissolution or domestic violence.
- Many have experienced a period of homelessness or feared that they might (18%); nearly half have a friend or family member who has (43%).
- However, only seven percent believe that they themselves have a “major responsibility” to address homelessness – a low initial benchmark for public will-building; however, an additional 56% believe they have “some” responsibility.
- At the same time, residents are highly willing to take a variety of specific actions to address homelessness (making direct contributions, giving money, or volunteering time); they are more reluctant to take action through the political process.
- At the same time, sizable majorities support policies that would address homelessness through increased taxes or spending.
- The strongest messages are those identifying the homeless as families; stressing that anyone can become homeless; and urging assistance for those working to improve their lives.
Recognition of the Problem of Homelessness
Homelessness is a lower-tier issue for residents in their own community.

Q2. I am going to read you a few things some people say are problems or issues affecting their communities today. Please tell me whether you personally think it is an extremely serious, very serious, or somewhat serious problem or if it is not a problem at all in the city or town where you live.
Of course, residents do express concern about a range of issues that contribute to homelessness.

Q2. I am going to read you a few things some people say are problems or issues affecting their communities today. Please tell me whether you personally think it is an extremely serious, very serious, or somewhat serious problem or if it is not a problem at all in the city or town where you live.
Geographic distinctions were quite sharp, with Denver County residents vastly more likely to indicate concern about homelessness in their area.

**Concern About Homelessness by County**

- Extremely/Very Serious
- Somewhat Serious
- Not a Problem/DK/NA

Broadening the focus to the Metro area as a whole yields nearly twice as much concern about homelessness.
Perceptions of Who is Homelessness & Causes
Voters’ image of homeless people tends to focus on single males and veterans.

I am going to read you a list of different subgroups of the Metro Denver population. Please tell me whether you think rates of homelessness tend to be higher, about the same, or lower among that subgroup than among the population at large.
Public perceptions of who is homeless do not necessarily align with the realities.

- Poll findings also show some misperceptions among those polled about who is homeless, compared to the latest data on homelessness.
- Those surveyed were more likely to say that men are disproportionately homeless than any other group (66%). Only 19% believed there to be higher rates of homelessness in families with children, or homeless women (17%).
- Yet the annual Point-In-Time Survey, which provides a current estimate of homelessness in Metro Denver, shows that families with children make up more than half (53.1%) of the homeless population in region.
- In addition, while the ratio of homeless men (60.2%) is higher than women (39.5%) for the region as a whole, only Denver and Boulder have a majority of men experiencing homelessness; the other five metro counties have a majority of women who are homeless.
Residents see substance abuse, mental illness, & unemployment as key drivers of homelessness.

I am going to read you some things people have said cause homelessness. Please tell me if you think it is almost always, usually, sometimes, rarely, or never part of the reason that people are homeless.

2014 Point-In-Time Survey
*Reasons why Metro Denver Residents say they are Homeless*

The Point In Time Survey, conducted by Metro Denver Homeless Initiative, provides an annual report on homelessness in Metro Denver. *Poll respondents replied these were “almost always” or “usually” the reasons that people are homeless.*
Residents perceive that it is highly difficult for people who are homeless to find a home.

In general, when someone is homeless, how difficult do you think it is for them to find a permanent place to call home: nearly impossible, very difficult, difficult but achievable, not so difficult, or not difficult at all?

- Nearly impossible: 20%
- Very difficult: 50%
- Difficult but achievable: 27%
- Not so difficult: 2%
- Not difficult at all: 0%
- Don't know/NA: 1%

Nearly Impossible/ Very Difficult: 70%
Personal Engagement with the Issue
Nearly half of residents have friends or family who have experienced homelessness.

Do you have close family or friends who have experienced a period of homelessness?

- Yes 43%
- No 52%
- DK/Refuse/NA 6%
More than one-in-ten residents say they themselves have experienced homelessness, and one-in-five have come close.

Have you personally ever experienced a period of being homeless? (IF NO: Have you ever had so much trouble paying rent or a mortgage that you thought you might become homeless?)

Q16. Q17. Asked only of those who have experienced homelessness.
For most, the duration was fairly limited.

How long did the last time you were homeless last?

- One week or less: 8%
- A few weeks: 15%
- About a month: 19%
- Several months: 37%
- A year or more: 20%
- Don't know/NA: 1%

Q16C. Asked only of those who have experienced homelessness (N=61)
Most stayed with family or friends, or in a car.

During the time that you were homeless, where did you stay?

- In a car: 36%
- With friends or family: 34%
- In a shelter: 14%
- Somewhere else: 8%
- On the street: 6%
- Don't know/NA: 3%

Q16A. Asked only of those who have experienced homelessness (N=88)
Residents offer widely varying circumstances for their time being homeless.

In a few words of your own, could you describe the circumstances that led you to be homeless for a period of time?

- No employment/Loss of job: 36%
- Divorce/Family issues: 29%
- Couch surfing/No stable place/Month-to-month renter: 17%
- Young person on my own: 15%
- Low finances: 10%
- Moved out of state: 6%
- Medical issues: 3%
- Other: 12%
Support for Potential Solutions
Residents are confident that the problem of homelessness can be improved – and one-quarter believe it can be solved.

Would you say homelessness is a problem that could be solved, a problem that could be improved but not solved, or a problem that is unlikely to improve?
Residents see government, charities, and the homeless and their families as primarily responsible – but see little personal role.

</table>
(FAMILIES) Over half of the homeless households in Metro Denver are families with children. Children need stability and shelter so they can grow into their full potential. We should help those families to give their children that chance.

(COMPASSION) Sometimes individuals face multiple, serious challenges that are hard for most of us to imagine. It’s important that we put ourselves in their shoes, and continue to show compassion and make sure everyone in our community has a place to call home where they can live with hope and dignity.

(ANYONE) Most people tend to experience homelessness because of financial problems, domestic violence, or poor health. These things can happen to anyone, even those who never expected to become homeless. We should do more to address homelessness, because we never know when it could happen to us or someone we love.
A message about economic impacts largely falls flat.

(RESPONSIBILITY) People who are homeless need to take personal responsibility for improving their situation. When they are ready to do so, we should give them the hand up they need – not a handout.

(HUMAN RIGHT) Safe shelter is a basic human right that should not be denied to anyone in our communities. We need to commit the resources to make sure everyone has a safe place to call home.

(MORE HOUSING) People living in temporary homeless shelters, or outdoors, often lack the stability to address other problems in their lives – problems which, unless addressed, will continue to make them vulnerable to homelessness. If we provide more affordable housing, with supportive services, we can break this cycle and reduce homelessness for the long-term.

(ECONOMIC IMPACT) Homeless people and panhandling make neighborhoods feel unsafe and keep people away from businesses. Addressing the problem of homelessness is vital to the health of our local economy.

Q14. Here are some statements from people who believe individuals and local governments should do more to address homelessness in Metro Denver. Please tell me whether you find it very convincing, somewhat convincing, or not convincing as a reason to support such efforts.
Themes

- The data suggest four themes that will be critical in building public will around homelessness:
  1. **Too many Denver area families are homeless.** Residents do not think of the homeless as families, but as single men. Messaging that reframes the issue as one affecting families is highly effective in building support.
  2. **Homelessness can affect anyone.** Many residents have experienced homelessness themselves; have feared that they would; or have a friend or family members who have. Messaging which stresses that circumstances can leave our loved ones homeless has an impact.
  3. **The homeless deserve our compassion.** Denver Metro residents show many signs of compassion for homeless people: most say they acknowledge or assist homeless people they meet, and have given money time, or material support to help the homeless. Messaging appealing to this instinct is effective.
  4. **We owe help to those trying to help themselves.** Many Metro-area residents, but particularly conservatives and seniors, respond strongly to messaging which notes that homeless people must work to better their own circumstances – but that we must all contribute to helping them succeed.
